Project Name	Project - Job/Skill Recommender Application
Maximum Marks	2 Marks

Customer Problem Statement:

The cloud based application sometimes loads slowly, Because It has no proper internet connection. Many rural areas don't have proper internet connection. Some customers are facing some problems. The statements are given below. In the recommendation system the problem is trying to forecast the option the users will have on the dissimilar substance and be able to recommend the finest items to each user. Another some problems in the recommendation system are data sparsity, scalability and gray sheep.
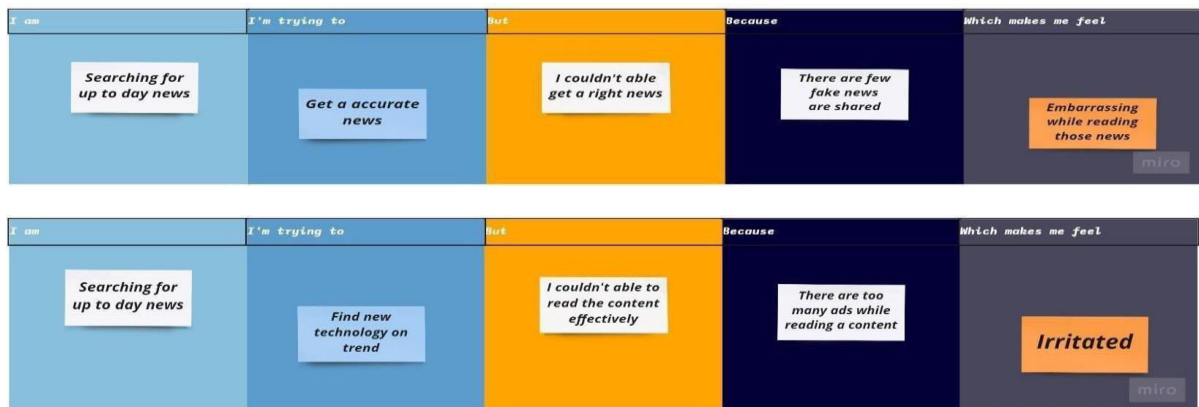

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I'm a Job Seeker	Searching job in your application	It shows more unwanted advertisement	Sometimes I unfortunately clicked the adds, and it will redirect to another page	I cannot focus to search job for me
PS-2	I'm a Job Seeker	Find some new companies for find best job	It does not have filter function	I think you not included filter option this app	I cannot search new companies
